

Perspective Lab: Instructions

[Help Center](#)

In this assignment, you will be using linear algebra to remove the perspective from a photograph. Don't be intimidated by this lab. You might find it a bit hard to understand, but the actual tasks involved are not too hard.

To complete this assignment, please carefully follow the following instructions:

1. Download the detailed instructions for this assignment, [perspective_lab.pdf](#)
2. Download the stencil, [perspective_lab.py](#), for this assignment, and move it into your `matrix` folder.
3. You do not need to submit anything marked *ungraded*.
4. Support code and data resources can be found at the [Coding the Matrix Resources page](#). Here, you will find [board.png](#), [image_mat_util.py](#), [png.py](#), and [cit.png](#).
5. For each problem/task,
 1. Test out your solution in the Python REPL;
 2. Copy your solution into the stencil file `perspective_lab.py`;
 3. Submit your solution by opening a console window, navigating using `cd` to the `matrix` folder, and entering the command `python3 coursera_submit perspective_lab.py`. The script will ask for your username and password. They are located [on the assignments page](#).

You can use the submit command to submit solutions for as many tasks as you like at one time.

Have fun!
