

The Function problems: Instructions

[Help Center](#)

In this assignment, you will write a few more comprehensions, then do some ungraded problems about functions, composition, and inverse, and then do some simple probability problems. Remember, old mathematicians never die—they just lose function.

To complete this assignment, please carefully follow the following instructions:

1. Download the detailed instructions for this assignment, [The_Function_problems.pdf](#)
2. Download the stencil, [The_Function_problems.py](#), for this assignment, and move it into your `matrix` folder.
3. You do not need to submit anything marked *ungraded*.
4. Support code and data resources can be found at the [Coding the Matrix Resources page](#).
5. For each problem/task,
 1. Test out your solution in the Python REPL;
 2. Copy your solution into the stencil file `The_Function_problems.py`;
 3. Submit your solution by opening a console window, navigating using `cd` to the `matrix` folder, and entering the command `python3 coursera_submit The_Function_problems.py`. The script will ask for your username and password. They are located [on the assignments page](#).

You can use the submit command to submit solutions for as many tasks as you like at one time.

Have fun!
